

Prevention of recidivism prisoners by emphasizing the role of technical and vocational training skills training in prisons (case study of guilan province)

asghar shahriari*,reza parastesh,

Abstract Since care after release, is a very important part of the rehabilitation process, this item a must for all prisoners, especially for those with the greatest need, to be provided and any planning in order to prevent recidivism, without providing job for clients will be absurd. That is why in today's world, education and skills acquisition and consequently employment, government policy plays an essential role. So that in accordance with policy of removing imprisonment, special emphasis has been the issue of training and employment of prisoners. Because each individual prisoners released prison, without a profession cannot be considered a subsistence economy, mental, and moral character to life and continue living normally in society. One of the conditions of recidivism, unemployment, that as long as the causes are, will be one of the effects of crime. Having just and skill connected released prisoners with families and communities, But more importantly the sustainability of the lack of interest towards this crime is. In today's society, many organizations are responsible for education. In this regard, the role of Technical Education and Vocational skills training in prisons and annual obligations to the organization, is obvious to all. In this study, the author pointed out the government's policies on vocational training in prisons. Intends the role and impact of the training on the prevention of recidivism by prisoners Gilan province to investigate.
