

# The Complex of Ecotourism and Tourism in Harmony with Nature(Deylaman(

Hedyeh Rastkar\*,Dr.Mohammad Mehdi Raees Samii,

**ABSTRACT:** Iran as a country has many potential environmental broad ground (basis) for increasing and improving tourism's activities. These tourism's attractions and grounds are including of 2 parts: One is natural attractions and the other is historical attractions that are so various and diverse. The special natural and morphological conditions of villages, absence of uniformity, the various and unique humanity characteristics are the important factors of tourist's attractions. Furthermore the life style, foods, dress, customs, feasts, mornings, architectures, spaces and settlements, brick and muddy cottages and the stone and wooden ones, summerhouses, temporary canopies, farms, and gardens and mosques and shrines and also various handicrafts, moreover, dairy and farm products, streams, aqueducts, all are the characteristics of rural environment that many people want to visit there. Siahkal city and Deylaman part with a lot of abilities and properties is the most greatest tourism industry and assets of iran, for this reason, have the specific cognitive value to develop and extend tourism industry. In this thesis we try to show the tourist attractions of this regions and try to apply the natureoriented architecture and design tourism's complex, eco tourism with the maximum use of regional building, climate design of complex according to the tourist's and visitor's needs and also designed to response to the all segments of society. All references and informations is collected library and by environmental research to recognize region capabilities and hereby to protect the views and cultural heritage resources. We want to prepare this region to attract more and more domestic and foreign tourists.

**Keywords :** Keywords: tourist attraction, Siahkal, crowbars, natural attractions, native architecture.
