

And elements of the crime in the virtual space by Studying the Iranian penal system

narges valizadeh*,D.r shahla zaree,

Abstract Computer crime said to those criminal acts that have traditional nature but takes place through modern tools such as computers and internet. Development of technology and information science application and comprehensive use of it by all people and also comprehensive development of communications, different networks, internet and.... in all societies and its impact on economic, political, cultural, social, administrative and military has caused to have existed threats against relationships and events so that nowadays one of the challenges of the world, especially our society is lack of awareness of rights and duties. Although ignorance of the law don't mean no liability and it may be impossible to expect all citizens to have legal knowledge and ability in the use of legal techniques. So and due to a sense of duty towards society and also aims to protect the rights of citizenship have forced legislators and lawyers to codify laws with the Islamic community situation. The research method is library and data collection tools is receipt. Sources used in this research are jurisprudence and legal books and also web sites and press charter. Crime in internet cyberspace is possible and features of criminal acts in this space are hiding the identity of the offender and easily doing a criminal act. The nature of cybercrime is also the guarantees lack of proper administration and disproportionate punishment of these offenses with reasons of cyber crimes repetition.
