

Tourist resorts of the stack Langrood Tourist resorts nearby house Daryabeigi Langrood design with context-oriented architecture approach

Sudabeh nowruzi*, Mostafa pourali,

Abstract Cultural heritage is a nation's identity and is an identification document among other nations. All people have a role in protecting and understanding of cultural heritage. One way to introduce archeological-cultural heritage to the people and the world, besides required field to revive and protect and preserve cultural heritage areas is participation of tourists especially cultural tourists in these areas. A large extent of tourists come to Iran for visiting architectural works. So Iran's cultural heritage can be a means for attracting tourists. In this regard this study is based on descriptive -analytical method, designing a tourism-recreational site beside Langrood's Daryabeigi House in Guilan province with a field-oriented architecture and according to physical and cultural field. Now the skyline of this site is so heterogeneous and created an unsuccessful urban edge. In this paper an attempt is made by presentation of appropriate solution to improve an urban edge by the use field-oriented architecture with respect to cultural heritage and due to this valuable treasure, culture, customs of this area creating a tourism-recreational site based on the needs of cultural tourists and also converting to a successful urban edge. In the first step of this thesis, generalities of the research were examined in order to reach an appropriate understanding of the topic, then in the following chapters theoretical background, review of literature, examples, internal and external manifestation, design site, criteria and standards of design and to the end designing process were discussed. An attempt have been made to present a design to meet tourist's need and make a recreational site to visitors.

Keywords : Keywords: Field-oriented architecture, urban edge, tourism, cultural
