

An Assessment of the Effect of Cyberspace on Cultural Geography Developments in Education, Gilan Province

Habib Seyfi*, Mohammad Golafrooz,

The aim of the present study is to evaluate the effect of cyberspace on cultural geography developments in Gilan province education department employee and provide appropriate strategy as a possibility of optimal utilization of the promotion of cyberspace for science development. This study is attempting to answer the following question that what are the impacts of cyberspace development on cyberspace on cultural geography development of education in Gilan province? The gained results in this research show that all respondents are with very strong religious beliefs and believe that are well acquainted with cyberspace and it has a significant effect on social behavior and science development. Most respondents claim that the effect of cyberspace on religious beliefs in Gilan education department employee is medium to high, and convince that staying connected with social networking services is, in fact, helpful. They state that major negative impacts of the development of cyberspace and IT (Information Technology) is false illusions (disbelief) and has a moderate impact on the development of the Islamic identity among education department employee. The findings of this study indicate that the cyberspace has a significant role on cultural geography development in Gilan province education and as well as, there is a great relationship between cyberspace development and the components of cultural geography in Gilan province education department. In total, the development of cyberspace is essential for all government offices and if used correctly, these information tools and the media can play a very useful role in advancing science. Since, cyberspace and its existing risks are the first for the public and there is no limit for it, therefore it is very necessary to pay attention to this issue and raise awareness of family and educational institutions regarding the effects of this space, and those who are responsible should have an important role in this regard.
