

# The design of recreational residential complex with approach to naturalistic in Chamkhale

E.Kazemi Moghadasi\*,

**Abstract** Human has always thought of communicating with their environment. This relationship is rooted in human nature and the human soul by combining architecture, has become more prominent in the nature. Today architecture tries to the desired to human nature, in addition to reducing the damage caused by man on his surroundings, also linked to be closer to the man and nature. In this study tries to set is designed to both in terms of form harmony with nature and that its performance in terms of any of the damage caused by the construction of the nature and into the environment. to achieve this important first library studies of reference books and articles, theoretical framework developed the subject. Then referring to field observations and images of the site case study investigated. In this study, we have tried to set out with the help of architecture as resorts - accommodation in Langeroud (beach Chamkhaleh) is designed to motivate the audience to their leisure, the environment and respect for nature step take to organize this area.

**Keywords :** Key word : Recreation, Stay, Respect for nature, environment
