

Comparative analysis of leisure in tourism areas, surrounding the city of Rostam Abad of Roudbar

Seyed Hosein Hoseini Gigasari*,

The overall goal of this research is a comparative study of tourism around the city Rostamabad. Given the importance of tourism areas this research aims are: a) the relationship between opportunities and attract tourists with attractions for leisure and b) type of attraction and leisure tourism demand volume itself. Therefore library and field methods were used to gather information. In order to answer the research questions and the questionnaire was used to achieve the desired goals. Questions down in the questionnaire was descriptive and therefore the method of research is descriptive-analytic. Tourists and visitors the surrounding areas & Rostamabad are the population of this research. The sample size is 186 and it was determined among tourists. Therefore statistical data contains answers of the questions by tourists. According to a survey at the end of their relationship to the achieved result, we can organize and manage tourism for leisure very well with inviting investors participation and supervision of decision-making and enforcement qualitative and quantitative improvement of tourism facilities and infrastructure information creation of artificial attractions and supplements.

Keywords : Leisure, Natural attractions, Historic attractions, Religious attraction, peripheral areas
