# **Relationship between personality and problem solving styles with marriage satisfaction among married students**

hanieh pourreza\*,ali sayadi,

**The aim of this study was to investigate the relationship between personal traits, problem solving styles, and marital satisfaction in married university students. The sample was included of 322 married university student in “science and research university of guilan” ed with cluster sampling method. Data in this research were analyzed based on Neo’s personality inventory (short form), problem solving styles and Enrich’s marital satisfaction. The results showed that there isn’t a significant relationship between personality traits and marital satisfaction, or between personality and problem solving score. But, there is a significant relationship between problem solving scores and marital satisfaction. Therefore, the third hypothesis is approved with 99% confidence (P**

**Keywords : Personal traits; problem solving; marital satisfaction.**
