
The Effects of Managerial Ownership on the Relationship between Intellectual Capital Performance and Firm Value

Hamidreza Ebrahimpour*, Dr. Parisa Khaligh,

Abstract The main objective of this study was to investigate the effect of managerial ownership on the relationship between intellectual capital and value of the company's performance. Therefore the effect of managerial ownership on the relationship between intellectual capital and performance components used include capital, human capital, structural capital on firm value based on multivariate linear regression model, was investigated. The sample consisted of 119 companies listed in Tehran Stock Exchange for a period of five years 2011 to 2015. The results show that managerial ownership only on capital employed taken interoperation and corporate values affects the connection between the IC and other components The performance of human capital and structural capital performance of the company's value had no significant effect.

Keywords : Keywords: managerial ownership, intellectual capital, value of the company.
