

Reviews and relationship between early maladaptive Schema meta-marital relationships and style of lovemaking between married women

sodabeh khadem hosseini*, Dr. Ghorban Ali Yahyaee, Dr. Ghorban Ali Yahyaee,

This study follows the relationship between early maladaptive schemas, extramarital relations and style of lovemaking between married women in Rasht. Methods descriptive and correlational study population consisted of all married women who are counseling centers in Rasht in 1395. the sample size is 180, that among married women who refused to cooperate were ed by convenience sampling method. In this study, data collection questionnaire and short form of early maladaptive Yang (1998), a questionnaire-style love Sternberg (1986), a questionnaire justify extramarital relations (1981). To test the hypothesis, the test statistical parametric Pearson correlation coefficient and multiple regression Shd.drzmn statistical operations using the software spss analysis. Results indicate that the scheme cuts and exclusion ($r = 0/52$) self-schemas ($r = 0/29$) other orientation scheme ($r = 0/33$) schemas vigilance ($r = 0/21$) and schema impaired limits ($r = 0/28$) with extramarital affairs among married women statistically meaningful. And extra-marital relationship ($r = -0 / 43$) with Waze style love among married women is significant in terms of cuts and rejection scheme ($r = -0 / 51$), self-schemas ($r = -0 / 17$), schema other orientation ($r = -0 / 22$), schema vigilance ($r = -0 / 24$) and schema impaired limits ($r = -0 / 23$) with the style of lovemaking between married women meaningful.

Keywords : Keywords: maladaptive schemas, extramarital relations, style of lovemaking
