
The effect of imports and exports on economic growth in Iran

Hajar Bakhshi Peshi*, Dr. Behrooz Fathi,

Abstract Present research aims to investigate the effect of imports and exports on economic growth gross domestic product (GDP) in 1985 until the end of the 2014's. Also the impact of working capital and physical capital on economic growth (GDP) is examined. To collect data to test hypotheses were used annual data the Central Bank of Iran and the Statistical Center of Iran. After evaluating the independent variables include export and import and working capital and physical capital, their relationship with variable economic growth (GDP) was examined using Spearman correlation coefficients. And it was found that the independent variables, including export, import, working capital and physical capital has Positive and direct relationship with the dependent variable of economic growth (GDP) and using stepwise regression model for estimating GDP was determined.

Keywords : Key words: Economic growth, GDP, import, export, working capital, physical capital
