# **Geo-economy status industrial towns in the development of geo-political Gilan**

gholamreza rezaei bazneshin\*,

**Abstract** One of the important strategies for regional development in the decades 50,60,70 industrialization strategy was the dominant development and industrialization of work, the creation of industrial parks the late 19th century due to industrial development, land constraints , prevention of industrial pollution and the use of economies of scale industries in some industrialized countries because of Grdyd.snay rural employment, increase incomes and reduce poverty in rural society, particularly communities agriculture is awful important. Living problems, differences in income and living standards between urban and rural populations rural areas to urban migration are important factors, many planners to adopt new strategy for rural development led industrialization of rural areas in particular. Thus, diversification of the rural economy and efficiency through providing a variety of economic activities, especially be noted industrialization of rural areas. In today's political and economic development of the province to address the analysis of geographical spaces has an important place. It's time to reach sustainable development in the real sense of political and economic analysis, along with other social, environmental and physical infrastructure and in a balanced way and of course full settlement. In this article we consider the relationship between the industrial estate and political development, industrial towns as independent variables and the dependent variable influencing factor, namely political development, checked. Agriculture, livestock, fishing rooted in participatory processes (whether on a conscious or unconscious) that can motivate educated youth in particular between different sectors (urban and rural) wall of mistrust between the government and the people picked up and feel and setting up of industrial estates and rural development. Due to the aforementioned factors play an important role in the industrial towns in this province are responsible for policy development.
