

# Child care center for orphans with a view to promoting creativity

Fatemeh fahimpour\*,

In recent years, significant populations of orphans in Iran as a social problem clearly and around the world with skyrocketing These children are facing. Children are asked without walking in a society that embraces not offer. The lack of attention to their future could bring dangerous conditions to our society. For this purpose, the establishment of centers for orphans, so that the necessary standards of compliance is strongly felt. The first step is to a suitable site to establish necessary contacts with the community. The placement of the center in the neighboring district because of social interaction that takes place in a neighborhood and getting to know children with social norms, are suggested. Literature suggests that creativity is directly proportional to the variety of environments. In other words, the diversity of the physical environment has a positive impact on the creative process and the diversity of environments conducive to the evolution of creativity. Creativity and innovation, growth and development, and development capabilities, features and new opportunities for activities and provides various programs. Positive and constructive outcome of creativity, increase flexibility, improve the level of learning capabilities and people. The results of the present study seeking design ideas for orphans especially for ages 6 to 12 years in the city of rasht, with a view to enhancing their creativity. The main objective of this project is to create a social atmosphere, fresh vpvya for children to enhance their sense of creativity. Spaces designed in a child care center for orphans based on the needs of children and factors affecting the development of creativity in children. Moreover, such a condition should have been necessary to induce a sense of the diversity and attractiveness children away to captivity.
