

# **The impact of radio and television and the overseas sites of the Islamic Republic of Iran on the convergence of Islamic countries geo-culture**

Peiman Khodaei\*, Dr. Yousef Zeinolabedin Amoughin,

**Geo culture of Geo public is a complicated process of authority, culture and geographical environment due to informing developed movement and replacing in period of time and in the geographical environment of ideology like of these social processes in fact geo culture is a composition of replacement- space processes of cultural authority between different actors and by the same persistent action, special cultural view is produced in this time, Iran and caring of that in the current world, is the most necessary duty of majority of people as cultural behavior of any Iranian people in all of the world could make them to be affected in improvement Islamic Iranian education image between other people. Although science 35 years ago our culture society is a kind of expectation for them reason, independent subject in management of country like exterritorial media are informing for development of Islamic Iranian culture. These subject are enhanced in the last subjects that for many centuries have worked in our region because of caring Iranian of strange of caring Iranian of strange culture and by that it is produced a complication of proctors of modern culture of Iran (media) for the same reason production of exterritorial networks of Islamic republic of Iran is known as a necessity in promotion of Islamic education. Media and new inventions of communications with geopolitical attitude are the most important factors of authority, so assay affection of radio and TV and exterritorial sites of Islamic republic of Iran by descriptive method on geo culture convergence of Islamic countries and their role convergence of Islamic countries.**

**Keywords : method on geo culture convergence of Islamic countries and their role convergence of Islamic countries.**
