
development of structural-gender model for relationship of meaning in life with intimacy and marital adjustment

amaneh poursharif*,valialah mousavi,

Abstract The aim of current research was to development of structural-gender model for relationship among meaning in life with intimacy and marital adjustment. The current research was descriptive of cross-sectional. The number of 480 married students of Tehran universities in the academic years of 2015-16 were ed by Purposive sampling method and responded to steger meaning in life questionnaire, Thompson & Walker intimacy scale and Locke-Wallace marital adjustment questionnaire. The gathered data were analyzed by spss and lisrel software's through Structural equation modeling. The results showed that there are direct relations between meaning in life (Presence of Meaning and the search for meaning) with marital intimacy and marital adjustment (P

Keywords : Keywords: meaning in life, intimacy, marital adjustment
