

The Design Of Touristic Village with Approach to Nature-oriented Architecture in Anzali Free Zone

arman ron*,Rabe Rahimi,

Abstract Nature is the artwork of the greatest architect, God and one of the most important sources of creation for architects. Since the very beginning of human construction, natural phenomena have had a considerable role in the issue and have been a basic principle. Using natural forms in architecture, is a sign of the human's tendency to God's creation and its impact on them; On the other side, nature-inspired forms have constantly had an extreme holiness and respect among different cultures and nations around the world, both in the aesthetic and the function. Nature impacts lots of strategies leading to the creativity and is invariably a present and non-classifies a source of idea. In the current essay, with the subject of "Designing a tourist and recreation village with an approach to the organic architecture (nature-inspired architecture), we've tried to consider all the factors for creating a satisfactory place for human activities whilst going along and respecting the nature. This essay is the result of library and field research. Library study has been mostly used for the parts related to the design process and for the information about trading, we've used files study. Qualitative data have also been collected by direct observation and semi-structured interviews. The first chapter is dedicated to the problem statement and the theoretical framework, the second chapter to the research background and the theoretical foundation, and the third one to the standards and regulations related to the project, and the physical planning concluded them. The last chapter includes the concepts and the design. The drawings of the project, based on the best and most feasible design option, and the suggested building structure are also available in this part.
