

Spatial Local Analysis of Recreational Uses in the City of SumoSara

Karimi Comma Mohammad Ismael*,

It is not possible to achieve a sustainable and sustainable society without the presence of citizens living in it. Therefore, urban spaces, as a typical manifestation of the city, must meet the social needs of citizens. Webster needs to provide the users with the services and services they need. The recreational amusement area forms part of the city's imagination, as one of the real phenomena, is one of the first issues that people are always in contact with. The importance of recreational leisure spaces in the urban environment, to the extent that it is considered as one of the indicators of development in urban communities. They have a social, economic and ecological role. And has the benefits of treating mental illnesses, an environment favorable to children, social integrity, comfort and the like. The method of research in this dissertation is descriptive-analytical method, based on information, library documentation, university (articles and proceedings) and field research (view and questionnaire). That with the goal Analysis of recreational and recreational use of the Monastery of the City Based on spatial metrics. Identify and review effective factors in the creation of spaces and recreational and recreational activities. Finally, there are some ways to promote recreational and recreational activities in the city of Sumo Sara. The results of the survey show that the city of somasara that it has the potential for development of recreational and recreational areas have amusement rides, suitable for urban population. The recreational facilities in the city do not respond to the needs of citizens. and also Per capita green spaces and parks, cultural, sports, and so on, is far the standard of a country. Therefore, the construction of new parks and new buildings for the citizens to be entertained
