

Geoeconomic analysis of work and employment fields in the Astara border region

mounsf kazimian matak*,

Today, with the expansion of the twenty-first century economic phenomenon, the geoeconomic strategies have been gradually replaced instead of traditional geopolitical strategies. Thus, without relations Commercial and economically viable and sustainable, geo-economical logic in foreign policy of countries will not be of desirable status. Therefore, the development of trade-economic relations and consequently the volume of influence and impact The power of a state in peripheral areas and ... The economic interpretation of spatial development is the geopolitical borders of countries. This thesis aims at analyzing the geoeconomic fields of work and employment in the Astara border region and designing this The question is "What are the geostationary fields of work and employment in the border region of Astara?" The hypotheses are as follows: 1. The marketplace can be applied to the fields of work and employment The Astara border area will be affected. 2. The borderline situation can affect working and employment fields in the Astara border region. The research method was descriptive-analytical and information gathering tool The process of collecting library and documentary and field studies and, in conclusion, the findings of the research show that the border market of Astarada has played an important role in employment and development.

Keywords : Geo-economics, Employment, Economic Development, Boundary, Astara City
