
Designing Child Home of Langroud with the Physical Environment Tailoring Approach to Improve Child Creativity

fateme akbarkhah golsefidi*,

Something that today it is important to improve the education of children to discuss creativity. Physical properties outside a kindergarten or nursery area it affects the overall concept of performance. Since Karkdhay local traditions and can not be changed, this area is possible to do activities that normally are not derived traditional educational theories, but these theories are generally complementary or even contradictory.

Keywords : Child Home, Physical Environment, Creativity, Langroud
