

# Residential and tourist complex with approach of respect to nature

Banafshe Mirzaei\*,Dr. Rabee Rahimi,

**Abstract** Pristine natural environment or protected areas are suitable for eco-tourism and the development of tourism acts as a double-edged sword. This is because this development can cause the destruction of the protected areas. On the other hand, to maintain a stable eco-tourism, a general recognition of the area's capabilities to deal with tourism the environmental, social and economic perspective; understanding the expectations of the native people and tourists is required. Due to the deep and strong relationship between tourism and architecture which links tourism to culture, art and natural environment; and the importance of tourist resorts in the tourist attraction of a region, city, country, etc. ; the necessity of considering architecture of and designing these kind of resorts to develop a stable tourism is felt. The main target of this research is to study and present solutions to decrease natural environment harassment and environmental effects. The results demonstrate that using different methods of architecture, especially new principles of stable architecture and the design of these resorts has a direct impact on decreasing pristine natural environment and eco-tourism areas harassment; and presenting designs compatible with nature can practically cause persuading the right behavioral patterns towards nature and limited natural resources which are needed by next generations

**Key Words:** Architecture, Environment, Stable tourism (Eco-tourism), Tourist resorts.

**Keywords :** Key Words: Architecture, Environment, Stable tourism (Eco-tourism), Tourist resorts.
