

Relationship between spiritual intelligence , pleasure and self-control with Rasht students educational neglect

seyedeh akram nemati*,

Abstract This research has done to study relationship between spiritual intelligence , pleasure and self-control with Rasht students educational neglect . This research is crrelational type, studying community is all Rasht students in 1395. Students number at area one (studying area) at first period at five girl highschoools is 1250 that ed 291 ones by cluster sampling as case through Moorgan table and conducted Badi et al.(1389) spiritual intelligence questionnaire , Vedsy (1997) pleasure scale,Tanjeni(2004) self-control scale, Solomen and Raselboom(1984) students educational neglect evaluation questionnaire on them. Results analysed by Pearson correlational coefficient and multi regression. Regression results showed that to determine neglect determine and predict spiritual intelligence predictive variable , $R^3=0.033$ basis variable variance. Also Pearson correlational coefficient results show that there is a negative relationship between spiritual intelligence and neglect ($p<0.01$) and there is a positive and meaningful relationship between neglect and self-control(p

Keywords : Keywords: spiritual intelligence, pleasure, self-control, educational neglect
