**Abstract** The city is a great work of art that has its own audience and its population. The ultimate goal of a city is to create a pleasant environment for the people they live in. Urban space is the place people spend most of their time, they establish the maximum amount of communication with each other and their surroundings. Therefore, providing space and creating the necessary facilities is very important . In this research, the analytical and descriptive method is used to collect the materials in a field and library. The statistical population of Rasht city is the aim of studying urban furniture and its consequences on Motahari avenue in Rasht. The results show There are some problems and shortcomings in urban facilities and facilities. This has ultimately led to dissatisfaction among officials and city executives, especially the municipality, with the provision of appropriate services to citizens. This displeasure with urban executives in a situation urban management And the city's municipality has implemented appropriate plans and designs over the years And plans to improve the conditions of urban furniture and the quality of hospitalization in the future, which will surely ensure the quality of the visual quality of urban amenities and amenities will ultimately improve the quality of life and citizens' satisfaction the urban management of Rasht.
