
Design ecotourism set with respect to nature

seyedeh samaneh sadri*, mohamad mehdi raeis samiei,

Abstract The design of ecotourism complex with the approach of respect for the nature Despite the fact that Iran is between ten first countries in having the most historic ,cultural and natural resources but still it dedicates only one percent of the worlds income share of tourism industry to itself . Gilan province due to involvement of several factors such as well climate ,moisture and fertile soil , the expansion of roads and having more than 70 tourism regions, steppes, plains and mountains and original natural landscapes has become the unrivaled pole of Irans ecotourism. Considering the importance of the tourism and its undesirable side effects on the nature , the author has tried in the study to design an ecotourism complex with the approach of respect for nature in Talesh city. This thesis has been developed in five chapters.in the first chapter an over view of the plan is stated.in the second chapter we identify the topic and in the third chapter we study the theoretical principles of the plan. Programing ,site ion ,site analysis are in the fouth chapter and standards ,physical program and design are discussed in the fifth chapter. **KEY WORDS:** Environment ,tourism ,ecotourism

Keywords : KEY WORDS: Environment ,tourism ,ecotourism
