
Center for the intellectual Development of children with creativity enhancement approach

hamidreza shoa hasani*,

Abstract Developed countries have for years found that creative creativity should be given special attention to childhood And the talents of people childhood are discovered and taken into consideration. birth, as long as the person breathes, learning will continue. But the role of childhood in learning and development is undeniable, hence the need for attention and planning most. Perhaps the best foundation for this category is the educational environment in which children are grown. Each community's children play a significant role in shaping its future. These children are going to be socially active in the next tomorrow and will become the main citizens of the community. Children receive some of their most essential experiences and knowledge the physical environment; Therefore, the architecture of child-friendly learning environments is important in the learning process and the development of children. In the opinion of environmental psychologists, the training camp should be designed in such a way that learning is easy and pleasant. The increasing need of our country to expand educational spaces in line with population growth and inadequate existing spaces is one of the main problems of society that should be addressed. Research shows that creativity is not merely inherent, and much of it is acquired. One of the solutions to the development of creativity in children is to use the creative power of the game. Now, the question arises whether the architectural environment and the educational environment can contribute to the growth of creativity, and with what and by what means? The purpose of this study is to achieve the principles of designing children's special spaces for children ages 6 to 9, emphasizing the utilization of environmental capabilities affecting children's minds and behavior, and the approach to promoting their creativity. One of the ways to grow creativity in children, Utilizing imaginative imagination, curiosity and play, is the use of the creative power. In the end, the result was achieved in terms of color,

form and flexibility in educational environments Can play an important role in the development and development of creativity in children. Key words: creativity, play, children, educational environment
