

Analysis of geoanomic capabilities of Rudbar city in Guilan province

Ali Zahedi*,

Geo-economics has become the most influential political, economic, and geopolitical factors in the national, regional and global context for studying and reviewing political decisions and rivalries of power, and the impact of these factors on the shaping of regional and global geopolitics. Iran has become one of the most attractive focal points in regional and global interactions, having become one of the most sensitive geopolitical locations in the world and enjoying its various functions in the peripheral geo-space regions. Reconstruction of the country's geo-power capabilities depends on the capacities of smaller political units such as the province and the city. Due to its advantages such as proximity to the capital, suitable land, proximity to the airport and the Anzali Free Zone, having access to the transit road, freeways, railways, as well as the abundance of agriculture, gardening and aquaculture sectors, has the capabilities Due to the importance of the geoeconomic location of Rudbar in Guilan province, the author uses the descriptive-analytical method and library studies to answer the research question, which is as follows: The components affecting the geoanomic capabilities of Rudbar city in the province What are Gilan? In order to study the hypotheses and realization of the goals of the research has been developed. The research findings indicate that there are numerous economic capacities in the agricultural and horticultural sectors, industry, roads and transportation, tourism, aquaculture and... in Rudbar city, which has a significant geoeconomic position and location in this province in Guilan province. The proper planning and the general effort of authorities and the public can flourish the potential of this city and provide the basis for further development of the city and the promotion of livelihoods.

Keywords : Geo-economics, Development, Roodbar, Guilan
