
Geopolitical Analysis of National and Religious Symbols of Gilan Province

mohamadreza mohseni eslahi*,

Human beings use speech or writing to convey what they have in mind. Although human language is full of symbols, it also uses signs and profiles that are not very clear in many cases. What we call our symbol is a term, a term or name that, in addition to its contractual and obvious sense of everyday life It has contradictory meanings. The province of Gilan, due to its natural, cultural, human, historical, ... privileged status, has various symbols in the national and religious dimension that can lead to the formation of identity. Therefore, in this thesis, using the descriptive-analytical method, the author attempts to evaluate the research hypotheses to analyze the political geography of national and religious symbols in Gilan province. The findings of the research indicate that the formation and development of national and religious symbols in Gilan province have been influenced by the natural, cultural, social and human conditions of the province, and the favorable capacities provided by them have stabilized the status of the index of these symbols at the national and global levels.

Keywords : political geography, symbol, identity, Gilan province
