

# **The Relationship between Parenting Styles, Stress Coping Strategies and Perfectionism with Rumination among Parents of Stuttered Children**

Azam Vakil Sadeghi\*, Leila Moghtader,

**The aim of this study is to investigate the relationship between parenting styles, stress coping strategies and perfectionism with rumination among parents of stuttering children. The method of this research was descriptive-correlational. The statistical population included all parents of stuttering children who referred to speech therapy centers in Rasht in 2017. Based on available sampling method, six speech therapy centers were selected (that 25 samples each center were selected), eventually 150 individuals were considered as samples. Rumination questionnaire (Hoeksma et al., 1999), Baerind's childbearing styles questionnaire (1972), Blingers and Moss (1984), and perfectionism questionnaire of Short et al. (1995) were used in this research. Data were analyzed by SPSS version 24 multiple regression analysis and correlation coefficient. The results of this study showed that there is a significant correlation between parenting styles, coping strategies with stress and perfectionism with parenting rumination.**

**Keywords : parenting styles, stress coping strategies, perfectionism, rumination, children with stuttering**
