

Explanation the role of agricultural policies) Agronomic Activities (in rural economic development of Masal County after the Islamic Revolution

mohammad shirzad vezmatar*,

Codifying agricultural policies is one of the important agricultural issues, which has a significant role in the economic growth and development of agriculture due to the rapid growth of the rural population and the specialization of agricultural products. The purpose of this study is to explain the role of agricultural policies (agronomic activities) in the economic developments in the villages of Masal after the Islamic Revolution and provide solutions to improve the agronomic policy (fundamental and Supportive) in Masal, Land use developments, increasing agricultural entrepreneurship, farmers' familiarity with new agricultural methods, increasing irrigation efficiency, increasing production per unit area, and consequently increasing revenues, reducing costs and improving their living standards. Masal has a lot of potential in the field of agronomic activities and 67% of the people in the city are engaged in agricultural work. Unfortunately, little attention has been paid to the agricultural sector of this city in the development plans and economic policies, and as a result, farmers, especially farmer villagers face serious problems, which need to pay attention to the agricultural sector, in the development plans and the necessity of orienting the goals of research projects in this section. The research method is based on descriptive-analytic approach. Indicators such as population index, location, and level of implementation, distance or proximity to market centers have been used in order to study the agronomic policy status. The results of this research indicate that the implementation of fundamental and Supportive policies in the agronomic sector has led to maintaining land use, increasing agricultural entrepreneurship, increasing income and reducing costs in the villages of Masal.
