
Reviews Dust in Tehran and its Impact on the Tourism Calender in Rasht

Sanaz Motamedi*, Dr. Bahman Ramezani,

Abstract The present study studies the status of dust in Tehran and its effect on the tourism calendar of Rasht. And its main purpose is to plan tourism for the citizens of Tehran in those years when the city is unhealthy and they are reluctant to leave the city. Considering the appropriate time span of Tehran in the mountainous areas of Gilan and Rasht, this issue has been investigated. However, the researcher initially, using the descriptive-analytical research method and the study of written documents, collected data the drought and air visibility of Tehran in the months of the year based on the 16-year statistics of Mehrabad Meteorological Station (2000-2015). In addition, by compiling a questionnaire in order to evaluate the hypotheses and research questions and its random distribution among the citizens and experts of Tehran, their views on various aspects of the phenomenon of dust have been asked. It should be noted that the number of specimens required was estimated to be 384 samples based on the standardized Morgan Morgan sample table; the questionnaire was entered into the SPSS software and the initial information was extracted it. The questionnaire was analyzed and evaluated. The findings of this research show that in Tehran, May and May, 48 and 45 days, respectively, had the most days with dusty phenomena. Spring and summer were the most days of dusty phenomena, which had the most impact on tourism activities of Rasht city. has it. But according to the TCI index values in Rasht, during the months of April to May, the tourism climate is in a good (excellent, very good and good) situation and provides a general condition for tourism activities that will provide for the citizens of Tehran It is a good time to do tourism activities. Also, during the cold seasons that Tehran faces with the phenomenon of concentration of pollutants and unhealthy weather, despite the fact that it is not a good time for tourism activities in Rasht, surveys showed that by having a holiday, people were forced to leave Tehran and Getting to the healthy weather is just right, and this trend

adds to the prosperity of tourism in Rasht.
