

Investigating the Performance of the Municipality in the Physical Safety of the Green Space of Rasht (Case Study : the Mellat & Mohtasham gardens

Mohammad Zamir Kaveh*,

Abstract The implications of modernism and urban life make it increasingly necessary to develop green spaces and parks in order to improve the conditions and quality of life of citizens. In fact, sustainable urban development is a vital approach to urban people, which not only gives him prosperity and prosperity but will be a major trend for later generations who will inevitably live in cities. Considering the necessity of safety issues in public spaces and urban parks, this issue was studied in Rasht city. In the past, parks were handed over to private companies and contractors, but in the past few months this task has been delegated to the Green Space Organization of Rasht Municipality. In this research, the sample population are Mellat park and Mohtasham park in Rasht city. To obtain the result, t-test and Mann Whitney test have been used. Safety indicators, including physical safety, health, readily design, accessibility have been investigated. What has been achieved at the end is the difference in the safety issue in both the Mellat and Mohtasham parks. The most important performance of the municipality of Rasht in the area of two park ,was an attempt to observe the standardization of play equipment and park cleaning. What we have seen in this study is the lack of consideration of the suitable shielding around the river in Mohtasham Park and the lack of car parking in both parks, as well as the inadequacy of sports equipment and passageways for disabled people. **Keywords:** Park, Safety, Sustainable Development, Rasht City
