
The survey of Iran's non-oil exports and the impact of human capital on economic growth

Vahid Abolfathi*,

Abstract Economic growth is one of the purposes, which each economy is looking for, and its reason is to attach a huge number of profits and benefits coming off in the process of growth. Non-oil Export expansion is the reason of Economic grows, because incomes non-oil has been increased meanwhile non-oil export incassation, and it will be the cause of quality improvement in re-attribution of creation sources approach to efficiency activities and economy production and growth gain. We are exploring to describe relationship between independent and dependent variables, using statistical tests in this research, which is descriptive. As a goal, applied studies are used. Statistical society of current research was recently economic activities of Iran. Due to the data modality, we chose Time-Series method. After studying of the classic hypotheses, related model has been determined. Results showed that human investment and non-oil export have positive and meaningful influence on the Iran's economic growth.

Keywords : **Keywords:** Economic growth, non-oil exports, Human Capital, the classical hypothesis.
