

Residential Complex with Naturalistic Architectural Approach

Mahdis Ebrahimi*,

Abstract Man is always connected with nature and has tried to manipulate nature in a way that is optimal in nature. This kind of symbiosis is well seen throughout human history. In other words, human beings have always focused on the factors in nature when they have sheltered, housing, the environment, etc. They always consider nature as an important part of their plans and plans. Has been used. Today, one of the major concerns in human societies is the crisis of human communication with nature, while the contribution of human activities in the field of architecture is important. In fact, the spaces that are created do not facilitate human-human communication with the natural environment, but also an obstacle to relationships. Therefore, it is necessary to look for architectural solutions in order to expand this relationship. Therefore, a proper definition of human-to-nature communication should be given in this connection, and it is suggested that the definition of the principles and methods for designing be proposed. Architectural space based on it is designed to facilitate the relationship between man and nature. If our architecture can be facilitated, in terms of nature, it can interact well with nature, and human and environmental relations can be strengthened. In the relationship between man and nature, we want to facilitate the relationship between man and the environment in the architectural environment through naturalistic architecture by knowing and knowing the natural patterns. In this regard, we first arrive at a series of design principles and guidelines through nature-oriented architecture that facilitates the relationship between man and nature, and in the second step we are looking for a series of executive solutions so that the architecture In accordance with the above rules, we create the living standards in accordance with the above principles.

Keywords : Keyword: nature-oriented architecture, tourism, residential complex
