

Designing Research Center- Exhibition of Anzali Lagoon with a Respect to Nature Approach

Nahid Ayobi*,

Abstract Human being is not nature; however, he is created it. Man like all the living beings of the nature is influenced by its rules and follows it. At the modern age man by his ill-informed actions has entered extensive irreparable damages into the body of nature; however, in the recent years with developing necessary education and systematic programming, it is tried to reduce these demolitions to the minimum. This project designing Exhibition and research Center of Anzali Wetlands. The first goal of this project is to make systematic center with the aim of introducing scientists and researchers to zoological and botanical coverage, protecting wetland environment, and representing appropriate procedures in order to remove its intricate difficulties. It is designed to obviate environmental educational and public contribution. In addition to systematizing educational issues. Holding science symposia and environmental exhibition in order to make direct relation with factors of this unique nature are some of the other goals of this project. These goals will be the substructures of developing eco-tourism in the region, and developing eco-tourism will have a direct effect on the economy of region. **keywords:** Nature, Human, wetland environment, eco-tourism , economy
