

# **Comparison of interpersonal forgiveness, defense styles and emotional regulation in women with type 2 diabetes and normal people in Rasht**

amir reza almasi nokiani\*,

**Abstract** The aim of this study was to compare interpersonal forgiveness, defense styles and emotional regulation in women with type 2 diabetes and normal people in Rasht. The causal research project is comparative. The statistical population of this study included all type II diabetic patients who referred to the specialized clinics of Rasht city for a total of 420 . The sample size of 200 patients was 100 patients with type 2 diabetes and 100 normal subjects ed by simple random sampling method. In order to collect the data, an interpersonal forgiveness questionnaire, Andrews et al. (2006), Gores and John's (2003) Emotional Stress Questionnaire were used. In order to analyze the data, descriptive statistics (mean and standard deviation), multivariate analysis of variance were used. All statistical analyzes in this study were done using SPSS-22 software. The findings showed that the difference between interpersonal forgiveness, defense styles and emotional regulation in women with type 2 diabetes and normal individuals with Lambda and wilk = 150,  $F(6,193) = 182.45$  (statistically)  $P$

**Keywords :** Key words: Interpersonal forgiveness, defense styles, emotional regulation, type 2 diabetes.
