

Impact of Financing Methods on Performance of Rural Production Cooperatives in Fooman Town

Hamzeh Moharer Ashoorabadi*,

Abstract The purpose of this study was to investigate the effect of financing methods on the performance of rural production cooperatives in Fooman County. Research is an applied and descriptive survey purpose. The statistical population of the research is the employees of rural production cooperatives in Fooman Town. A random sample of 207 employees was ed as sample. The data gathering tool was a questionnaire whose reliability was higher than the optimal value of 0.7 and its validity was confirmed by the content validity method and face validity. In order to analyze the data, SPSS23 software was used to examine the descriptive statistics through mean and standard deviation and frequency and to investigate the causal relationship between the variables using LISREL8.56 software and using the structural equation modeling method. The findings of the research showed that financial factors such as: facilitators, support, participatory, consulting, technical and legal factors affect the financial performance of rural cooperatives in Fooman County. Among these factors, the most effect was on the consulting dimension And the least impact on the legal dimension. In this regard, the promotion and coherence of legal factors can enhance the financial performance of rural cooperative enterprises in the best possible way.
