

Geo-analysis of Fouman Youth's leisure time

Fatemeh Reyazi Maafy*,

Abstract Leisure time refers to times in which people do not have the work they need to do, and usually tends to do more frenetic and uplifting activities at these times. Leisure time is the times a person sets it according to his / her personal preferences and his schedule for each one. Different depends on the taste, mental requirements, age and financial ability of the individual. Leisure time and how it is spent is one of the issues that has become an important topic since the Industrial Revolution. In fact, leisure is a new social sphere that is meaningful and important in the context of modernity of contemporary social cultural changes and the growth of consumer culture. After the industrial revolution and the growth of industry and technology, it attracts the attention of researchers. In this research, the study of leisure time in Fouman County has been done. The method of research is descriptive-analytical and the method of collecting information about the field and library. The statistical population of the study was 380 people in the city of Fouman. To study leisure time in different geographical environments 190 people in the city and 190 people in the village were ed and randomly completed questionnaires. The results show that in the city of Fouman, youths are more interested in entertaining activities and cyberspace, and in rural youth areas more youth They are doing things that are economically economical Has a dignity Key words: geographic analysis, leisure, activity, Fouman County
