

# **STUDY THE APPROACHES OF EMPOWERMENT OF CHILDREN WITH DISABILITIES NGOs IN THE CITY OF RASHT**

zahra jafari\*,ali majidi,

**The present research studies approaches of children NGOs in the city of Rasht. The general goal of this research is to study the procedures of improving the abilities of children and study the relationship between independent and dependent variables. In this research, two principal hypotheses and three minor hypotheses are used; which are: Principal hypothesis: 1. there is relationship between improving capacity and abilities in improving the abilities of children NGOs. The minor hypotheses are: 1-1- there is relationship between the interaction of children and young adolescents NGOs and the government and improving abilities of NGOs. 1-2- there is relationship between transparency and improving abilities of children NGOs. 1-3- there is relationship between the law and regularity and improving abilities in the Children NGOs. 2. There is relationship between participation and improving abilities in the children NGOs. In this research correlation descriptive method has been used. The statistics society of the research includes managing director and members of board of director of children and young adolescents NGOs in the city of Rasht. Consisting 258 individuals. To a sample group as indicator of society subject of study. Simple random sample has been used. The volume of sample in this research was 130 individuals. The measurement tools in present research were the questionnaires of approach to improve ability spectrum (Lickert). In deductive statistics section, the Q2 statistics tests and Carl Pierson (convergence test) has been used. The results obtained present research are as follows: by rejecting H0 (statistical hypothesis) the major hypothesis (1) was confirmed. By rejecting H0 (statistical hypothesis), the research hypothesis 1-1 was confirmed. Hypothesis 1-2; too was rejected by rejecting H0 (statistical hypothesis) and H1 (research hypothesis). Hypothesis 1-3 was confirmed as well and by rejecting H0 (statistical hypothesis) and H1 (research hypothesis).**

---

**Hypothesis 2 was accepted, H1 (research hypothesis) was approved by rejecting H0 (statistical hypothesis). Confirming the research hypothesis was done with  $\alpha 0.05$ . As a result, there was dependence between independent and dependent variable in this research.**

**Keywords : Empowerment, People, Inferiority**
