# **Designing an Outdoor Childrens Home with a Creative Approach to Children**

Ofogh Shahani\*,Dr. Mohammad Rasool Shahir Nikrooz Mobarhan Shafie,

**In this age, many children due to financial issues such as poverty, cultural, mental and health problems, etc ... lose the families and are familiar with the lack of supervision. As the children population is on the rise around the world, paying attention to them as a part of a constituents in the society and believing that they are the future, can support their bed and deal with their problems . Due to the importance of creativity in the future, it is important to address the issue of orphans who are parts of the future of the society. Creation and arouse curiosity and creativity in children are the most important goals which have an impact on educating of creative generation. Since the delivery of individuals to family or community is one of the goals of children's care center, so in order to preserve the mental health of community and also to benefit useful people , at first becoming familiar with variety of social and personality problems of children living in these centers, then knowing effective factors on creativity and finally adopting of strategies and principles that resulted in design of the favorite place for child and provided effective factors on creativity, are in objectives of this study. So content analysis of the texts in the field of architectural design , psychology, pedagogical science and human sciences with the terms and welfare instructions used for children. It is the main hypothesis of research to improve the quality of space and biological and building design on the basis of research achievements, we can promote the creativity component in children and appropriate orphans houses to do group participation, education, thinking and deepen sensory and emotional experiences. It is expected that designing a favorite environment with psychological principles considerably will decrease their anxiety and mental problems and then y considering the effective factors on creativity in design and by adopting the principles of architectural design and perspective, some creative behaviors such as curiosity,**
