
Coastal residential Complex with the aim of enhancing the sense of place attachment

armita khalatbari*, abbas torkashvand,

Abstract Some places have such a strong spirits that have similar effects on different humans And due to its objective and exterior features as well as mental experiences and images, established interconnection between the human being and the periphery And finally, the sense of place is formed. Since the sense of place leads to the survival of that place in the minds of its audience, Hence, given the importance of this concept in architecture, especially in places designed for recreation and leisure purposes, their main goals are based on the satisfaction of their audience. This study also aimed at studying and collecting opinions and analyzing them with the aim of acquiring effective factors on the sense of place and developing relevant guidelines in a residential recreational complex. Finally, models and suggestions were presented that would be effective in all time and space conditions and had the least dependence on variable factors such as culture and time dimension. **Keywords** Sense of Place - place Attachment - Identity -Coastal tourism
