## The Effect of Capital Structure, Future Growth Opportunities And Profitability On Debts Maturity

kobra naghshpour\*,

The current study investigates the effect of the capital structure, the profitability and the future growth opportunities on the debt maturity in the Tehran Stock Exchange. The corporate debt structure has always caught the attention of the creditors and shareholders of the company. Since, at the time of the liquidation of the company, assets and property will firstly be distributed among the creditors, thus, the debt maturity and its type is deserves serious important. The population consists of 90 the accepted companies on the Tehran Stock Exchange. Data were collected using the data panel method (cross-sectional and time-series data) and then were analyzed by multivariate regression. The results indicated that the variables of capital structure, profitability and future growth opportunities have an effect on the debt maturity.

Keywords: Capital Structure, Profitability, Growth Opportunities, Debt Maturity, Liquidity, Leverage, Company Size, Data Panel, Multivariate Regression
