

Urban planning in the central part of Rasht city with emphasis to Passive Defense

Nabiolah Yosef Khah*,

Non-operating defense is one of the most important approaches to urban crisis management, with worsening wars and the use of technology in modern wars, non-operational defense has taken on different faces. People today need different services to continue living and need a quiet environment within the city and have enough safety and comfort. Currently, the main objective of inertial defense is to immunize and reduce the vulnerability of the infrastructure needed by the people to gradually create conditions for security. The research in this research is descriptive-analytical. In order to do this research, documentary and field studies have been carried out to provide information and analyze and integrate them. Safety indicators in the field of non-operating defense through referral and field studies as well as studying existing maps have been investigated. In this research sample is the central part of Rasht city. The core of the city of Rasht, , is the gathering of various types of economic activities that the main business axes of the city lead to. In locating and focusing , GIS mapping software is used. .in terms of the status of the defense, We determined non-operating with this software with the help of the simbology command. Also, the Tapsis statistical model was used to investigate the non-working principle of non-operational defense in urban management. The results indicate high population density in low and low areas with high construction density and regular blockade and gravel-shaped structures along with tight narrow streets that can not be easily accessed by them for relief purposes. At the time of the incident, the lack of attention to the construction of shelters for the settlement of the population and the lack of design of public announcements at the time of the incident, as well as the neglect of the power plants and the presence of wiring and non-principled branching, the focus of the departments, which all say The lack of attention or awareness of urban management authorities to the non-operational defense in the central part of

Rasht city.

Keywords : non-operating defense, security, urban management, Rasht city
