

# **Comparative Study Of The Government Policies In Rural Development During Two Decades Recent (Case Study: Villages of Ghaemshahr County).**

Fatemeh taghavi\*, Nasrollah molaei hashjin (Ph.D), Mohmmad baset ghorshi minabadi (Ph.D),

**Addressing the issue of rural development as a process that should rural communities in all aspects of social, economic and environmental and upgrade and in urban areas and interact with other sectors, provide the possibility of achieving a balance between regional and national. Because Iran's rural population accounts for 28 percent of the country's total population, Therefore, any socio-economic mobility of them in the national and regional level will affect many other areas. Considering the importance of large-scale rural development, small-scale study to determine the role and impact of government policies over the past two decades in rural development is done in villages located in the city Qaem-Shahr. In general, comparative study of the role and functions of the rural development programs respectively. This study, in terms of target applications, in terms of nature, empirical and based on data collection, survey descriptive and exploratory research, however, is analytical. In this study, questionnaires for data mining software and SPSS was used to test the hypotheses of T-test was used. The main issue is to determine what approach the government and local and national scale and rural development policies over the past two decades (programs Second, third, fourth and fifth) has determined that these approaches and what the effects and consequences of policies on rural areas which lead to strategies for the improvement of village and rural development is discussed. According to research findings, government programs during the past two decades in the field of physical approach, population stabilization policy and rural management has been successful.**
