

The Relationship of Social Intelligence with entrepreneurial skills and creativity of Physical Education students of Islamic Azad University, Rasht

Ali Khodashenas*,morteza rezaei soofi,

This research was conducted with the aim of investigating the relationship between social intelligence and entrepreneurship and creativity skills of students through a descriptive correlation method. The statistical population in this study was all the students of Physical Education and Sports Sciences of Rasht Islamic Azad University which was 409 and the sample was 201 according to Morgan table. The tool used in this research was the Tromsø Social Intelligence (2001), the Margit Hill (2003) Enterprise Entrepreneurship Questionnaire and Randsip Creativity Questionnaire (1979). Data analysis in this study was done according to its nature, using SPSS version 23 and inferential analysis of data, correlation test and regression test were used to examine the status of each research index. The results of the research showed that there is a significant relationship between the dimensions of social intelligence and entrepreneurship skills as well as between social intelligence and creativity with respect to the significant level of 0/003.

Keywords : social intelligence, entrepreneurial skills, creativity
