

residential complex design and tourism with the approach of the eco - tourism

Javad Nemati ghazi mahale*,

In addition to architecture with the natural environment , duty to protect it against the damage the people it is responsible for the destruction of the environment to escape to a minimum. Architecture is the areas in which can be used for how the appropriate definition and finished with planning , according to the foundations of a string of understanding and recognition of human nature , balanced mix that human way to travel through the shorter , to nature and the truth . Architecture in the planning and programs in tourism direct relationship. Currently so that out of a total of studies and opinions on the state of tourism in Iran , unfortunately, this activity with a large global recession and pause in the country for the solution of the need for macro policies and objectives , tourism planning system on the scale of the local and national and international coordination in the management of tourism. In the planning to address the architectural role in the development of tourism and to attract tourists is of particular importance. Even to deal with the emergency plans and brief in accordance with the macro - and long - term goals for the development of tourism , influence and are very important . The project plan with regard to the situation in the city of Anzali tourist, made significant progress in the area of the tourism industry . While environmental monitoring , with the development of the area to maintain its natural ecosystems

Keywords : architecture, the natural environment , tourism, tourists , ecosystems
