

Garden design of the museum of Rasht city -oriented approach

Soheil Jafari Golafzani*,Dr. Marzieh Kazemzadeh,

Preserving the heritage and history of each country can familiarize the people of society with its cultural roots and, in general, the mystery of the society and its continuity. Today, the museum is named as the most important place for the preservation of the historical, cultural and industrial heritage of the countries. The industry that has been recognized as the most important factor in attracting tourists to the world, and many governments have made the development of this industry in recent years. The industry is expected to become the world's largest industry in the next 10 years. Separation all things can not be ignored in the educational research aspect of museums. Today, art gathering places are also recognized as one of the most important scientific research centers. The Garden of Art is a place for dialogue and face-to-face talks that today is one of the most effective marketing methods. The handicrafts and art industry for Iran, as well as many of the countries that have not yet gained experience in the development of this major economic segment. . Is a new activity. There are more activities to be done in this area that the museum is the best place to display these valuable artistic works. In this research, the main question to be considered is that the architectural components in the glass and the lake area that can be designed for design. What is the Museum of the Water Museum? With regard to the study of these components, our main goal in this study is to establish an effective relationship between the nature and the space of the museum and to achieve an effective measure on the design of the museum's garden, taking into account the environmental, climate, and cultural factors. This attempt has been made to achieve
