

Women's economical rights and their relation to the divorce

Mahshid Hassan Pour*,Dr.Zohreh Rahmani,

Family as one of the most important social institution has a stall among legal establishments, but despite cultural and historical importance of this institution, protection of laws and different programs, foundation and its continuity was inquired and it shows existence of marriage crisis and divorce ascent arc. Since the divorce crisis can be studied different aspects, family law has changed allot in the past so in this research we'll discuss economical demands for wife in divorce in family laws such as: dowry, Alimony, proverbs fees, school, classification of assets' condition and also how to collect them, and the performance of enforcement Ruler for the mentioned Rights, with aim of the evaluating changes' impacts for family bonds and its adaptation with the important role of women in economic cycle of existing families and changed cultural patterns and finally preventing the growing trend of divorce, to emphasize the contradictions and existing vacuities and disaffiliation between ascending arc of divorce and giving economic rights to women with descriptive analysis method. In continue with using mentioned reviews and their analytical results we'll find out that there is no relation between climbing divorce rate and giving economic rights to women and most of the times women don't get their economic rights and they are forced to give it away. Eventually considering cultural and social nature of family, some hints are given for completing and making the economic rights of woman, better and also for solving problems of divorce with a cultural approach and understanding the roots of it.

Keywords : economic rights, dowry, Alimony, proverbs fees, school, classification of assets, inherited
