

The Relationship between Financial Development and Government Role with Profitability in Banks Listed in Tehran Stock Exchange

sanaz javadi*,

Today, the preparation of various economic, social, Political and ... has become one of the most important activities of researchers and economic researchers. The same is true of the banking sector. In this research, we have tried to introduce and study the indicators of the banking sector and the relationship between them. The process of Iran's economic development has been analyzed in terms of financial development and can provide solutions for existing problems. The research data for a sample of 11 banks accepted in Tehran Stock Exchange, In the period of 5 years (the beginning of 1390 to 1394). The statistical information analysis in this research was done using EViews software. The results of the research hypothesis test indicate that there is no meaningful relationship between the bank's financial development and the role of the state with the banks' profitability.

Keywords : Key words: financial development, bank, government, profitability, economics
