

Changes at cultural and religious land use in the center of Rasht city over the last two decades

mohammad mohammadi*,

To provide desirable Cultural - Religious Spaces services, users should observe some criteria in the positioning and establishment in place. a) General criteria such as compatibility, comfort, performance, utility, health and safety. b) Specific criteria such as user establishment conditions in environment (including suitable and compatible adjacent and adjacency constraints) and basic criteria and specifications of allocated places (such as useful functions, covered population and breakdown parts). If these criteria don't be fully realized, Cultural - Religious Spaces users aren't able to play their roles. Hence, to ensure of observing the standards of positioning and conditions of establishment in place, this research has been paid to the quality assessment of these users. The existing situation in schools is evaluated in terms of compliance with mentioned criteria by compatibility, utility, capacity and dependency matrixes. These matrixes evaluate different criteria in different ways. In this study, preliminary data are collected in relation to the purposes and questions of research base on the realizing of the existing Cultural - Religious spaces user patterns in Rasht city and its adjacency users and the quality of per capita of Cultural - Religious spaces in this level through the organizational documents, field operations, develop of questionnaires, imaging; and the data are analyzed by the scientific descriptive-analytical method and these results are obtained:

Keywords : Key words: Analysis, Cultural - Religious Spaces, user, criteria, Rasht City.
