

The Role of Education in the Someh Sara in the Development of Environmental Geoculture

Amene Ahmadzade*,

Culture, facilities, and habits are humanly defined. In fact, the culture of expression: of all customs, arts, sciences, religion, and politics as interdependent components of a word that can be summarized and can be used in the community and can also be used. The end result is that you can announce the education environment and think about the monastery geocaching program? If so, you can sort through the command hypothesis guidelines and use your own training services, so you can create your own programs using different programs. Age, specialized environmental training, active encouragement in the field of environmental need, permitted management and maintenance, environmental permits, maintenance of content facilities, legal status and strong regulations. And industry polluters and licensors, using television and radio and mass media proprietors on the verge of presenting themselves to the public, resisting the beliefs and customs of the promotional environment, and possessing new customs in service delivery. Logical service using capability and culture.

Keywords : Geoculture, Environmental, Development, Education, Someh Sara
