

The Effectiveness of Premarital Education on Sexual Knowledge and Attitude, and Marital Intimacy Referred to Fouman County Counseling Center

Seyyede Narjes Parviz Farzam*, Leila Moghtader,

The family is the stem cell of society. Consistency and strength of the family depends on marriage and stable marital relationship. Therefore, strengthen marital foundations is the most important topics in society. Since, the root of many problems couples life, it is caused by a lack of awareness in various fields. The purpose of this study the effect of premarital training on the knowledge and attitude of sexual orientation and marital intimacy of the typwoman. This study was semi-experimental with control group. Its statistical population types were referred to the marriage center of Fuman county which is in the study period to conduct tests and get regular education. Of these there were 40 people who had the criteria for entering the study chosen and were randomly assigned to two experimental and control groups. The experimental group participate in 8 training sessions for 4 weeks. Tools used in this research demographic questionnaire/ Knowledge and Attitude SKAS scales/ questionnaire and Tompson and Walker intimacy questionnaire. Both groups answered the question at the beginning of the first and the last session. To analyze the data covariance analysis was used. Findings showed teaching sexual and communication skills on knowledge and sexual attitude and marital intimacy the experimental group has a significant effect on the control group (p
